Practices

Digital Health

As technology continues to rapidly transform the world, navigating legal and regulatory issues around digital innovation in the healthcare industry is more important than ever. Our interdisciplinary team includes attorneys with expertise in healthcare privacy, intellectual property, FDA and medical devices, vendor contracting, licensing, and mergers & acquisitions. We understand both the business opportunities and compliance challenges of new technologies, and have helped myriad healthcare and life sciences companies achieve their economic and legal objectives.

What We Do

- Telehealth and remote patient monitoring

  - Analyzing telehealth platforms and services to ensure compliance with applicable laws

  - Counseling clients with respect to state licensing and reimbursement

  - Drafting telehealth compliance programs, including policies and procedures

- Artificial intelligence and machine learning

  - Navigating development and deployment of AI/ML applications used for diagnostics, treatment, or research

  - Addressing ethical issues around the use of patients' data to train algorithms
